COMPREHENSION

(Passage 1)

Read the passage given below and choose the right answers for the question asked :

Most of us know that earth quakes are caused as the result of a sudden release of energy in the Earth's crust that creates seismic waves. Earth quakes can be dangerous as they cause fires by damaging electrical power or gas lines. A recent investigation by scientist at the U.S.A Geological survey shows that strange animal behavior might help predict future earthquakes. Investigators found such occurrences in a 10 km radius of the epicenter of a fairly recent quake. Some birds screeched and flew about wildly. Dogs yelped and ran round

uncontrollably. Scientists believe that animals can perceive these environmental changes as early as several days before the mishap. In 1976 after observing the animal behavior, the Chinese were able to predict a devastating quake. Although hundreds of thousands of people were killed the government was able to evacuate millions of other and thus keep the death toll at a lower level.
